Professional Development for Kansas Water Issues

Water Quality
Professional Development
October 4 and 5, 2016
Manhattan, Kansas

Water Quantity
Professional Development
August 24 and 25, 2016
Garden City, Kansas

Purpose

The Natural Resources Project Focus Team has determined that agents and specialists would benefit from water education sessions. Therefore, two types of professional development will be offered on water issues this year — Water Quality and Water Quantity.

Water Quality Professional Development

Water Quality Professional Development will be offered for agents and specialists to provide them with subject matter expertise about surface water quality. The session will involve topics such as, TMDL basics and EPA regulations, cropland and livestock waste runoff, streambank stabilization and private drinking water wells, in addition to understanding the role of Extension with local, state and federal agencies. This will be held in Manhattan on October 4th and 5th, 2016.

One complementary hotel night will be provided with the registration (October 4th, double occupancy), along with lunch both days and breakfast on October 5th. There will be no registration cost, but please register by August 28, 2016.

Go to the website: <http://www.kcare.k-state.edu> for more information and to register.

Contact Extension Specialists Charlie Barden or Aleksey Sheshukov for more information.

Water Quantity Professional Development

Water Quantity Professional Development will be offered for agents and specialists that are interested in more information about water quantity, issues and management of irrigated agriculture. This training will involve topics such as groundwater and the High Plains aquifer; irrigation basics and new technologies, trends and management strategies; Water Laws and policies; and state and federal water agencies. This will be held in Garden City on August 24th – training sessions, and August 25th in conjunction with the Southwest Field Day.

One complementary hotel night will be provided with the registration (August 24th, double occupancy), along with lunch both days and breakfast on August 25th. There will be no registration cost, but please register by July 8, 2016.
